

Ohio Voter Contact & Geographic Saturation Strategy

A proposal for Dr. Amy Acton for Governor showing how HomeReach can plan, creative, price, and execute statewide postcard programs.

Prepared for Dr. Amy Acton for Governor

AI-powered mail strategy + execution

Route overlays are planning visualizations until USPS counts are imported and timestamped.

HomeReach turns mail into an operating system for statewide voter contact.

Built from logistics and operational discipline: route planning, timing, approvals, pricing, and production visibility in one workflow.

Campaign intelligence

Public sources, candidate profile, research gaps

Geographic planning

County, ZIP, route clusters, media-market logic

Creative engine

Front/back concepts, comments, approvals

Execution control

Pricing, production, mail-entry timing, tracking

Built from operational and logistics expertise rather than traditional print-shop thinking.

Statewide campaigns lose time when mail strategy, creative, and execution live in separate rooms.

Rising costs and fragmented attention make unmanaged blanket mail expensive and hard to evaluate.

Traditional mail vendors often quote a job. Campaigns need to manage an operation.

HomeReach compresses quote, map, creative, approval, and mail execution into one visible workflow.

The platform replaces slow static quoting with coordinated scenario planning and route-aware campaign execution.

Traditional vendor

- Quote delays
- Static proofs
- Disconnected approvals
- Limited route visibility
- Manual status checks

HomeReach

- Fast scenarios
- AI-assisted strategy
- Flipbook review
- Route-aware maps
- Command dashboard

One workflow from map to mail

Acton campaign strongest mail path starts with trust-building suburbs plus turnout-critical metro corridors.

Final carrier-route IDs require USPS EDDM or carrier-route import before quote/checkout.

Franklin suburban ring

Columbus, Dublin, Hilliard, Worthington

220k-340k HH

Competent, family-centered

Cuyahoga + Lake trust corridor

Cleveland, Parma, Lakewood, Mentor

260k-390k HH

Steady, empathetic

Hamilton persuasion arc

Cincinnati, Norwood, Blue Ash, Anderson Twp

170k-275k HH

Warm, practical

Summit/Stark/Mahoning zone

Akron, Canton, Youngstown, Boardman

185k-300k HH

Plainspoken, worker-aware

Lucas NW amplifier

Toledo, Sylvania, Maumee, Bowling Green

95k-160k HH

Local, deadline-aware

Delaware/Union/Warren growth

Delaware, Powell, Marysville, Mason

105k-190k HH

Reassuring, pragmatic

A four-wave program lets Acton build name ID, credibility, contrast, and turnout on schedule.

Each phase has a distinct job, geography, cadence, quantity range, and creative lane.

Approval gates: source lock -> creative approval -> route count import -> quote lock -> mail entry.

The AI creative layer produces complete front/back postcard concepts, not generic placeholder proofs.

Every phase can generate emotional, issue, trust/social-proof, and contrast/urgency options for staff review.

EMOTIONAL / HUMAN

A doctor. A public servant. A governor for Ohio families.

Power belongs with the people of Ohio.

Learn Amy campaign story and make your voting plan.

Paid for by [COMMITTEE]. Final disclaimer required.

POLICY / ISSUE

Lower costs. Stronger care. Leadership that listens.

What Ohio families need now

Read the affordability plan.

Paid for by [COMMITTEE]. Final disclaimer required.

TRUST / SOCIAL PROOF

Ohioans know what steady leadership looks like.

Trusted voices. Local stakes.

See why Ohio leaders are paying attention.

Paid for by [COMMITTEE]. Final disclaimer required.

CONTRAST / URGENCY

Ohio has a choice: more struggle, or leadership that refuses to look away.

Do not wait until the final week.

Compare the choice. Vote on time.

Paid for by [COMMITTEE]. Final disclaimer required.

Campaign staff can see coverage, route readiness, creative status, and mail timing in one command view.

The dashboard exposes campaign readiness before money is committed or mail enters production.

Agent next action

Verify official campaign contact, import USPS counts, approve source-backed creative, then produce a pilot-wave proposal.

Route-aware planning makes statewide mail budgets easier to forecast before final quote lock.

HomeReach separates planning estimates from verified USPS counts and final production pricing.

Planning wave model

Intro	1.0M	\$0.54-\$0.68
Trust	850k	\$0.54-\$0.68
Contrast	650k	\$0.56-\$0.70
GOTV	900k	\$0.54-\$0.68

Checkout remains locked until route counts, print, postage, source timestamp, and approval are verified.

The campaign gets more than mail: it gets disciplined message repetition across the state.

The outcome is a faster, clearer, more coordinated voter-contact program with operational confidence.

**Disciplined repetition, visible execution, and
faster campaign decision-making.**

Start with a focused strategy session, then convert the best route clusters into a pilot wave.

The first session should align geography, message lanes, budget range, and a sample proof-to-mail workflow.

Built to help statewide campaigns move faster, communicate clearer, and execute mail with confidence.
